@[jrodrigv](#) and @[Rafterman82](#), are you still planning to maintain PWings? If so, it appears you have some new contributors who might like to join your consortium.

(See [#7486](#) and [#7502](#).)

The version file may be unsafe to use.

Up to 87 days now. Abandonment confirmed (but that hasn't been the active fork since [#7502](#) anyway). No new releases on the currently indexed fork since March. Let's try switching it over to this new fork...
